Summary

Final-year IT undergraduate at University of Moratuwa specializing in full-stack development. Proficient in Java, JavaScript, React, React Native, Spring Boot and MySQL, with hands-on experience in production systems and open source contributions. Seeking a software engineering or full-stack role.

Experience

Full Stack Software Engineer Intern | WSO2, Sri Lanka

Feb 2025 – Jul 2025

- Extended the **MIS Flash Report Application**'s P&L coverage based on the Finance Team's iterative requirements, expanding financial reporting scope across all business units using **React**, **Ballerina** and **MySQL**.
- Implemented subregion filtering enabling the Finance Team to view P&L data across global business segments for both annual and monthly views.
- Audited and corrected existing data calculation errors, ensuring financial data accuracy for executive reporting.
- Built an automated Excel export pipeline generating structured full, annual, and monthly reports, providing a one-click reporting solution.
- Engineered data aggregation pipelines to synchronize P&L-related financial data from enterprise platforms, including **Salesforce** and **NetSuite**.
- Worked directly with the Finance Team to gather and implement iterative requirements, operating in an Agile cross-functional environment with peer code reviews.

Projects

CentralSync - Internal Resources Management System | *React, React Native, Spring Boot, MySQL*

A web and mobile application for managing the internal resources (employee laptops, monitors, keyboards, etc.) of a company. My contributions include:

- User Management Section: Implemented features for adding and verifying users, creating passwords, and managing user profiles with editable details.
- User Activity History Section: Developed a comprehensive history log to track and display user activities.
- Issue Reporting Section: Implemented features for users to report and manage issues related to inventory items, facilitating smooth issue resolution and tracking.

Client: Rootcode Labs

GitHub Repository Links: [Frontend](#) | [Backend](#) | [Mobile](#)

Pathwise – AI-Powered Career Coaching Platform | *Next.js, Spring Boot, MySQL*

- A web application that helps job seekers identify ideal career paths, analyze skill gaps, and prepare for interviews.
- The app provides personalized job recommendations, resume optimization, and interactive tools like an AI Interview Coach to support professional growth.

GitHub Repository Links: [Frontend](#) | [Backend](#)

Morphologically Similar Plant Identification and Health Assessment | *Python, OpenCV, Flutter, FastAPI*

An ongoing research-based mobile application to automate species identification and health assessment of morphologically similar Ayurvedic medicinal plants in Sri Lanka. My contributions include:

- Designing and implementing a dual-path approach for species identification and health assessment of 16 single-leaf species across 8 morphologically similar pairs using handcrafted features (GLCM, morphological, venation) and MobileNetV2 transfer learning.
- Currently developing the Flutter mobile application and FastAPI backend to deploy ML models into a production-ready system.

Velosense - Advanced Bicycle Ride Tracking and Analysis System | *C, Flask, HTML, CSS, Firebase*

A system designed for both professional cyclists and daily exercisers, enabling them to track and analyze crucial performance metrics during their cycling journeys. My contributions include:

- Integrated the DHT22 sensor with ESP32 for humidity data collection.
- Programmed the OLED display.
- Developed the web platform backend.

Open Source Contributions

Wger – Open Source Workout Manager | *React* | [GitHub](#)

- Unified the frontend exercise search UI with the ingredients UI in React, implementing collapsible search options, local storage persistence, language filtering, category filtering, and exact name match search.

Nutrivigil - AI-Powered Nutrition Analysis Web Application | *React, Node.js* | [GitHub](#)

- Built voice input pipeline using Web Speech API with live transcription, auto-silence detection, and multilingual support.
- Enabled AI voice responses for voice-based health queries.
- Developed AI-driven healthy swaps suggesting safe food alternatives for unsafe dietary verdicts.

GroqTales – AI-Powered NFT Story Generator on Monad | *Node.js, MongoDB* | [GitHub](#)

- Migrated the profile system from static mock data to a dynamic Web3 architecture, integrating MongoDB for real-time user stats and wallet-based identity using Monad wallet addresses.

Education

B.Sc.(Hons.) in Information Technology

Aug 2022 – Aug 2026

University of Moratuwa

- Semester 3 SGPA: 3.7 | Semester 4 SGPA: 3.5

G.C.E Advanced Level Examination

2020

Panadura Balika Maha Vidyalaya | Z-Score: 1.65

G.C.E Ordinary Level Examination

2016

Panadura Balika Maha Vidyalaya | 9 As

Skills And Interests

Languages: C, Java, Python, JavaScript

Frameworks: React, React Native, Next.js, Spring Boot

DBMS: MSSQL, MySQL

Other: HTML, CSS, Figma, Blender

Interested Areas: Web Development, Mobile Development, Augmented Reality (AR), UI/UX Design

Hackathons

Idealize (2025) | *Inter-University Designathon* | *Semi-Finalist - Team BitBalance*

HackElite 1.0 (2024) | *Inter-University Ideathon* | *Semi-Finalist - Team VivalaCodes*

InspiHer-Tech V2.0 (2023) | *Programming Hackathon* | *Semi-Finalist - Team VivalaCodes*

Social Winter of Code (2026) | *Open Source Hackathon*

IEEE Xtreme 16.0 (2022) | *Global Competitive Programming Hackathon*

Extra Curricular Activities

Logistic Team - IEEE Open Week 2024 | *Organizing Committee*

Publicity Team - IEEE Open Week 2023 | *Organizing Committee*

Logistic Team - IEEE IAS VR Cade 2023 | *Organizing Committee*

Project Shilpasara - UOM Leo Club | *Organizing Committee*

Project TryLearnIt - UOM Leo Club | *Organizing Committee*
