Summary

I am a dedicated and enthusiastic IT undergraduate passionate about leveraging technology and problem-solving to create impactful solutions. My academic background has provided a strong foundation in full-stack development, with expertise in Java, JavaScript, React, HTML, and CSS. I'm currently working on full-stack projects, sharpening my technical and problem-solving skills. I tackle challenges with a collaborative and proactive mindset, aiming to deliver innovative solutions in the IT industry.

Experience

Intern Full Stack Software Engineer | WSO2, Sri Lanka

Feb 2025 – July 2025

- Developed and maintained the **MIS Flash Report** application for the WSO2 Finance Team using **Ballerina**, **React**, and **MySQL**, focusing on full-stack feature delivery and scalable architecture.
- Engineered complex data aggregation pipelines to synchronize P&L-related financial data from enterprise platforms, including **Salesforce** and **NetSuite**.
- Collaborated within a cross-functional engineering environment under **Agile** methodologies, contributing to peer code reviews and maintaining high code quality standards.

Projects

CentralSync - Internal Resources Management System | *React, React Native, Spring Boot, MySQL*

A web and mobile application for managing the internal resources (employee laptops, monitors, keyboards, etc.) of a company. My contributions include:

- User Management Section: Implemented features for adding and verifying users, creating passwords, and managing user profiles with editable details.
- User Activity History Section: Developed a comprehensive history log to track and display user activities.
- Issue Reporting Section: Implemented features for users to report and manage issues related to inventory items, facilitating smooth issue resolution and tracking.

Client: Rootcode Labs

GitHub Repositories Links: [Frontend](#) | [Backend](#) | [Mobile](#)

Pathwise – AI-Powered Career Coaching Platform | *Next.js, Spring Boot, MySQL*

- A web application that helps job seekers identify ideal career paths, analyze skill gaps, and prepare for interviews.
- The app provides personalized job recommendations, resume optimization, and interactive tools like an AI Interview Coach to support professional growth.

GitHub Repositories Links: [Frontend](#) | [Backend](#)

Machine Vision-Based Ayurvedic Plant Identification and Health Assessment | *Python, OpenCV, CNN*

A research-based mobile application designed to automate the identification and health assessment of morphologically similar Ayurvedic medicinal plants in Sri Lanka using machine vision. My contributions include:

- Developed a framework to resolve morphological overlap in similar Ayurvedic plants using single-leaf image recognition.
- Designed a system to assess leaf freshness and health based on moisture, fungal damage, and degradation.

Velosense - Advanced Bicycle Ride Tracking and Analysis System | *ATmega32, C, Flask, HTML, CSS, Firebase*

A system designed for both professional cyclists and daily exercisers, enabling them to track and analyze crucial performance metrics during their cycling journeys. My contributions include:

- Programmed the DHT22 sensor with ESP32 for humidity data collection.
- Programmed the OLED display.
- Developed the web platform backend.

Open Source Contributions

Nutrivigil - AI-powered nutrition analysis web application | *React, Node.js* | [GitHub](#)

- Added speech-to-text voice input for follow-up questions.
- Enabled AI voice responses for voice queries.
- Implemented AI-driven “Healthy Swaps” for unsafe food results.

GroqTales – AI-Powered NFT Story Generator on Monad | *Node.js, MongoDB* | [GitHub](#)

- Implemented the profile data model, integrated APIs, and refactored the profile page.

Education

B.Sc.(Hons.) in Information Technology

2022 August – Present

University of Moratuwa

- Semester 3 | SGPA: 3.7
- Semester 4 | SGPA: 3.5

G.C.E Advanced Level Examination

2020

Panadura Balika Maha Vidyalaya

- Z-Score: 1.65

G.C.E Ordinary Level Examination

2016

Panadura Balika Maha Vidyalaya

- 9 As

Skills And Interests

Languages: C, Java, Python, JavaScript

Frameworks: React, React Native, Next.js, Spring Boot

DBMS: MS SQL, MySQL

Other: HTML, CSS, Figma, Blender

Interested Areas: Web Development, Mobile Development, Augmented Reality (AR), UI/UX Design, 3D Game Development, Artificial Intelligence (AI)

Hackathons

Idealize (2025) | *Inter University Designathon* | *Semi Finalist - Team BitBalance*

HackElite 1.0 (2024) | *Inter University Ideathon* | *Semi Finalist - Team VivalaCodes*

InspiHer-Tech V2.0 (2023) | *Programming Hackathon* | *Semi Finalist - Team VivlaLaCodes*

Social Winter of Code (2026) | *Open Source Hackathon*

FestX 5.0 (2024) | *Inter University Designathon*

Hack Moral 6.0 (2024) | *Programming Hackathon*

Code-Rush (2024) | *Programming Hackathon*

Idealize (2023) | *Inter University Designathon*

Duothan 3.0 (2023) | *Inter University Buildathon*

IEEE Xtreme 16.0 (2022) | *Global Competitive Programming Hackathon*

Extra Curricular Activities

Publicity Team - IEEE Open Week 2023 | *Organizing Committee*

Logistic Team - IEEE Open Week 2024 | *Organizing Committee*

Logistic Team - IEEE IAS VR Cade 2023 | *Organizing Committee*

Project Shilpasara - UOM Leo Club | *Organizing Committee*

Project TryLearnIt - UOM Leo Club | *Organizing Committee*
